ANTISTATIC ADDITIVE STATICCONTROL AS77E40

TECHNICAL DATA

STATICCONTROL AS.77.E40 is a cationic surface antistatic liquid additive. Its power germicidal prohibits its use for the treatment of food packaging.

CHARACTERISTICS:

Type	cationic
Aspect at 20° C	clear liquid
Gardner colour	5
Volumic mass at 20° C	1
Flowing point	- 1° C

Solubility: water, alcohol.

Application: surface antistatic treatment.

USE:

STATICCONTROL AS .77. E40 is an antistatic agent (and bacteriological) for cationic surface, generally compatible with anionic surfactant.

Thermal stability active product of AS.77.E40 is excellent until 80/100° C.

Mix with 1 to 4 solvent volumes (water, alcohol, or water + alcohol, according to the necessary drying time).

Apply STATICCONTROL AS.77.E40 on the surface of the material to treat by spraying, soaking, and coating.

TRIAL DATA:

Though the above elements are exact, they are supplied for information only. We always advise the users to make some tests first.
