ANTISTATIC ADDITIVE STATICONTROL AS90E10

TECHNICAL DATA

STATICONTROL AS.90.E10 is a surface antistatic liquid additive. This additive is approved for antistatic treatment for food packaging (max = 100 mg/dm²).

Staticontrol AS.90.E10 is biodegradable at more than 99%.

Staticontrol AS.90.E10 is a slip additive too.

CHARACTERISTICS:

Type	anionic
Aspect at 20° C	pale yellow liquid
Volume mass at 20° C	1
Flowing point	0° C

Solubility: water, (or blending water / buthylic alcohol)

PH: 7

USE:

Thermal stability active product of AS.90.E10 is excellent until 240° C.

Apply STATICONTROL AS.90.E10 on the surface of the material to treat by spraying, soaking, and coating.

In case of embarrassing greasy marks (depending on material to treat) add 1 to 2 volumes of solvent in AS.90.E10 (water or water + buthylic alcohol (depending on the drying time required)).

We advise to make tests in case of printing (can increase slip effect too).

TRIAL DATA:

Though the above elements are exact, they are supplied for information only. We always advise the users to make some tests first.
